DATE OF INFO.

SUPPLEMENT TO REPORT NO.

25X1

THIS IS UNEVALUATED INFORMATION

25X1 All changes observed in the quartering of Soviet Army units in East Germany during the period under review were of only local importance. There also were no indications as to large-scale transfers. Upon completion of the personnel exchange movement, the strength of personnel increased by about 20,000 men and, as of January 1954, is estimated at 360,000 with about every third soldier being a recruit. The AT artillery units of all pertinent branches of service have been reinforced by 85-mm AT guns since October 1953 while, at the same time, the 76-mm guns have been turned in. Up to January 1954, the contents and time schedule of the training program show no diversions from those of preceding years. Winter firing practice on the troops training grounds started in mid-January. The term of service for Soviet officers serving with the Occupation Forces has presumably been prolonged from 3 to 5 years and the officers were permitted to be joined by their dependents from the USSR. Officers' dependents have been observed to arrive at the majority of the military posts of all army areas since late November.

GERMANY.Order of Battle.

1. Reports received during the period from 1 December 1953 to 1 February 1954 confirm the following units with their permanent post, [redacted] last date of observation: 25X1

A complete OB list which indicates Soviet Army units known to be stationed in East Germany and, for the first time, also contains the barracks installations, is attached as Annex 1.

Change of Quarters.

2. After completion of the fall maneuvers in October 1953, the 45th Gds Tank Regt of the 11th Gds Tank Div, formerly stationed in the Bohnitzsch Kaserne [REDACTED] in MEISSEN, first remained in its summer camp at KOENIGSPRUECK troop training grounds and is believed to have subsequently been transferred to the Neue Lager (1523).

Elements of the 7th Gds Tank Div, presumably the 4th Gds Mtrcl Bn, vacated the cantonment east of GROSSKUEHNAU in October 1953 and transferred to the barracks installation in KOCHSTEDT [REDACTED] which quarters the bulk of the 62d AAA Div (US).*

Immediately after, in the spring of 1953, the 80th Gds Hv Tank SP Regt of the 9th Mecz Div had transferred to the training camp in FORST TAUER, southeast of LIEBEROSE, its barracks installation in SPREMBERG [REDACTED] was turned over to the KVP. The majority of the regiment left the camp at FORST TAUER in November 1953 and moved into the new barracks installation north of DRACHHAUSEN. [REDACTED].*

The whereabouts of the 1719th AAA Regt of the 9th Mecz Div, which had also vacated its barracks installation in COTTBUS [REDACTED] for the KVP, could not be determined. It is believed that, since the fall of 1953, the regiment has been stationed in another barracks installation in COTTBUS or in the FORST TAUER training area.

A new barracks installation in WUENS DORF, which had been constructed in the summer of 1953, was occupied by a tank unit of the 9th Mecz Div in October 1953. [REDACTED]. It could not be determined whether the troops are elements of the 80th Gds Hv Tank SP Regt of a mechanized regiment. The transfer was presumably made to reinforce the security of the Hq GDFG.*

25X1

Units of the 10th Gds Tank Div that were transferred included the 63d Gds Tank Regt which moved from BRANDENBURG to POTSDAM in October 1953 and the 299th Gds Mort Regt and 359th Gds AAA Regt which followed to POTSDAM in January 1954. It could not yet be determined whether the main purpose of transfer was the concentration of the entire division in POTSDAM or the evacuation for other units, possibly KVP units, of barracks installations in BRANDENBURG.

Organization.

3. The personnel exchange movement, which had taken a period of six weeks, was completed in early December 1953, with 85 trains carrying about 117,000 recruits and 69 trains carrying about 95,000 discharges having been observed. Although the surplus of recruits which, compared with the total number of discharges, amounts to 20,000, will decrease in the course of 1954 by the discharge of sick personnel and reassignments, the result was a light increase of the strength of Occupation Forces who thus reached about 90 percent of wartime strength.

As a confusion with 100-mm AT guns had to be taken into consideration, the information in late 1953 that 85-mm AT guns were more frequently observed with the units in East Germany led to the hypothesis that the AT artillery was being reinforced. However, continuous supply from the USSR of 85-mm AT guns since October 1953 and distribution to the troops, who simultaneously turned in 76-mm guns to equipment collection points of the armies, confirm that Soviet units are being reequipped with this more effective caliber. A considerable number of 85-mm AT guns has so far been observed with the following units:

Army AT brigade of the Eighth Gds Army

Army AT brigade of the Third Shock Army

Light artillery brigade of the Second Gds Mecz Army

Two motorized rifle divisions of the Eighth Gds Army

The 94th Gds Mtz Rifle Div of the Third Shock Army

The 11th Gds Tank Div of the First Gds Mecz Army

The 1st Mecz Div of the Second Gds Mecz Army.

The tabulation shows that, probably, artillery units with predominantly AT missions are, at least to some extent, being reequipped.

No definite conclusions could yet be drawn on changes within rocket launcher units. As model M-13 launchers arrived from, or were dispatched to, the USSR in addition to M-31 guns, it is difficult to determine whether the units are being reequipped or reinforced. No new units have so far been activated.

Training.

4. In December 1953, training concentrated on individual recruit training. This year, observations of various kinds of training such as individual combat practice and, especially, close combat together with tanks, firing with light infantry weapons and mortars in open terrain, small-caliber firing from tanks and AT guns at special firing ranges and frequent practice marches at company up to and including battalion level were again made

SECRET/CONTROL - U.S.OFFICIALS ONLY

SECRET/CONTROL - U.S. OFFICIALS ONLY

- 7 -

25X1

at garrison training grounds and in terrain near the post. The two artillery divisions of the IV Army Corps, the army artillery and the artillery units of several divisions started winter practice of advanced combat firing in mid-January. Some of these units reached the troop training grounds by road. The return movement was made by rail except in some instances. Each unit practiced two to three days and, sometimes, also at night. The troops were quartered in tents and snow pits. The following details were learned:

ALTENGRABOW

From 11 to 21 January 1954 Howitzer artillery brigades and mortar brigades of the 6th Army Div and 25th ML Brig moved from RATHENOW to ALTENGRABOW by road and returned in 12 shipments.

From 19 to 24 January The 124th Hvy How Arty Brig (US) of the 6th Army Div went from BRANDENBURG to ALTENGRABOW and back to BRANDENBURG in two shipments.

JUSTENBOG

From 13 to 21 January The 34th Arty Div (US), organized into two groups which moved at different times, moved from POTSDAM to JUSTENBOG by road, and on 10 trains returned in two groups on 15 and 21 January.

From 14 to 25 January The 2d Light Arty Brig (US) and the 1st Recz Div transferred from DOBERITZ to JUSTENBOG and vice versa. The 2d Light Arty Brig (US) left on 14 and 15 January and returned on 17 and 18 January, each time in three shipments, and the 1st Recz Div left on 20 and 22 January and returned on 22 and 25 January, each time in three shipments. At the same time, artillery elements of the 6th Gds Tank Div stationed at JUSTENBOG practiced firing on the ranges north of FORST LINNA.

KOENIGSBRUECK

From 10 to 14 January Units of the 8th Gas Recz Div from EILENBURG, LEISNIG and MUESEN practiced firing at KOENIGSBRUECK. Shipments observed included 3 trains from EILENBURG to KOENIGSBRUECK on 10 January, 2 trains from KOENIGSBRUECK to EILENBURG on 13 January, 1 train from MUESEN to KOENIGSBRUECK on 12 January and 1 train from LEISNIG to KOENIGSBRUECK on 14 January.

SECRET/CONTROL - U.S. OFFICIALS ONLY

SECRET/CONTROL - U.S. OFFICIALS ONLY

- 8 -

25X1

LETZLING HEATH

- On 13 January AT artillery columns of the 304th arty brig (US) moved toward LETZLING HEATH by road.
- On 17 January Units of the 19th Gds Meez Div equipped with AT artillery and mortars were seen in the MAGEBURG area en route to LETZLING HEATH.

Divisions permanently stationed in the immediate vicinity of the troop training grounds of JUETERBOG, TETPLIN and ZEITHAIN engaged in winter practice firing with tanks and heavy infantry weapons as early as December and in January.

AUSTRON

One shipment each of the 31st AAA Div (US) and 6th Gds AAA Div (US) were observed between 28 December 1953 and 2 January 1954. It is, therefore, believed that individual AAA units also conducted winter firing practice. In 1953, the regular AAA firing started in mid-February.

Engineer Troops

Engineer units had already been engaged in practice marches at unit level in late December. In January, elements apparently started practicing employment under winter conditions of light bridge building equipment. A first shipment from JUETERBOG to the APOLIMSTORF training area on 21 January is indicative of imminent exercises on the Elbe River. The course of the training has so far corresponded to that observed during the preceding years. The fact that individual training in class rooms and barracks yards soon shifted to winter training in the terrain which included practice marches, bivouacks and firing practice indicated that the troops received hard drill under wartime conditions. Marches of heavy artillery brigades to the troop training grounds located a distance of more than 50 kilometers away showed that, despite the high percentage of recruits, the march efficiency of these was high already at the beginning of January.

Miscellaneous.

5. After the term of service of officers of the Occupation Forces had allegedly been prolonged from three to five years, married officers were probably permitted to be joined in East Germany by their dependents from the USSR. The arrival of families has been reported from all army areas since December. The procurement of billets has apparently been left to the troops who confiscated apartments of German civilians. This measure resulted in protests by the German population and German authorities, upon which, in some instances, confiscation orders were withdrawn, and troops made room for officers' dependents in the barracks installations, vacating some quarters and constructing low temporary barracks buildings. At the beginning of January, money was allotted to German Bau Unionen (construction firms) for the speedy construction of special dependents' billets in and outside the barracks areas. The buildings were allegedly to be completed by April 1954. Other information indicated that, effective January, officers' dependents were forbidden to enter East Germany before 1 May 1954. It is believed that this measure, if true and effective for the entire zone, resulted from difficulties in the procurement of quarters and, thus will only be a temporary one.

25X1

Transportation.

6. Traffic and Operations.

The traffic situation of the East German Railroads slightly improved during January, when the volume of traffic to be handled has always been relatively low. All freight space required could be supplied. The number of railroad cars claimed by the Soviet Occupation Forces increased again in connection with winter firing practices held at troop training fields after the beginning of January. The heavy frost after mid-January resulted in some operational difficulties.

The rising tendency which railroad coal stocks showed in previous months did not continue. The coal situation again became rather critical. According to the daily coal consumption quotas fixed at 24,500 tons of briquettes for locomotives and 2,600 tons of briquette units for shop operations, coal stocks available on 13 January 1954 amounted to only 5 days' requirements. This implies a decline of coal stocks of about 54 percent as compared with the status of mid-December. Coal stocks available in January represented only one fifth of normal stocks. This indicates that, for the time being, the East German Railroad Administration is not in a position to execute large-scale transportation operations. Use of brown coal was resumed in order to partly remedy the situation. On 13 January, the State Secretariat for Coal suspended brown coal deliveries to households. This measure is bound to have detrimental effects upon the morale of the population. Traffic through border stations was normal. Imports of iron ores and pig iron as well as railroad rails from the USSR continued at their previous level. The same applies to crude oil imports from Austria, bauxite imports from Hungary, and uranium ore exports to the USSR. Shipments of artillery pieces from the USSR to East Germany, which started in December, continued during the period under review. Grain imports from the USSR decreased compared with imports observed in December.

Railroad Construction Projects.

In connection with KVP construction projects to be executed near Strausberg (referred to as "Aktion oestlich von Berlin"), the East German Railroads allocated 11.8 million eastmarks for the construction of railroad facilities.

The reconstruction of the railroad bridge over the Neisse River near MUSKAU is nearing completion.

The double-track railroad viaduct over the Neisse River at GOERLITZ is scheduled to be completed in March 1954. The completion of this project would make it possible to reopen the double-track East-West route from BERLIN to DRESDEN via GOERLITZ.

Miscellaneous.

Extensive security measures were taken by the East German railroad authorities for the duration of the Four-Power Conference in BERLIN.

SECRET/CONTROL - U.S. OFFICIALS ONLY

SECRET/CONTROL - U.S.OFFICIALS ONLY

- 10 -

25X1

On 31 December 1953, the forwarding agency for reparations goods was deactivated. At the same time, Derutra (Deutsch-Russische Transportgesellschaft) was renamed Deutrag (Deutsche Transport-A.G.) and directly assigned to the East German Ministry of Foreign Trade. It is doubted whether reparations deliveries to the USSR actually stopped on 1 January as was officially stated. It is believed that reparations deliveries will continue under the disguise of exports.

Trial runs with flatcars mounting superstructures which had dimensions of Soviet-type boxcars were made on the FRANKFURT/Oder - BERLIN and the MUENSDORF-MAGDEBURG railroad lines. These experiments are noteworthy. They may be connected with tests related to mobilization measures required in the event of emergency or may anticipate a Soviet intention to ease the East German traffic strain by the lending of Soviet freight cars put on standard-gauge wheel sets.

Locomotive column No 10 from COTTBUS is scheduled to be transferred to SCHLAUROTH near GOERLITZ in March 1954. This measure may be connected with the completion of the railroad viaduct over the Neisse River at GOERLITZ. Effective 1 January 1954, 12-man teams were planned to be assigned to locomotive brigades instead of the previous 11-man teams.

The reserve pool of locomotives and freight cars is to be increased to 200 locomotives and 10,000 boxcars in 1954. This reserve pool is available for seasonal peak traffic and for unexpected military requirements.

As in the previous year, the numbering system in use for Soviet shipments was changed on 1 January 1954. The switch-over makes it difficult to identify the nature of Soviet shipments.

the park of operational railroad cars included 136,543 freight cars of all types and 8,984 passenger cars.

Supply.

Although information on supply traffic was rather scanty, reports on supply shipments from the USSR to East Germany indicated that shipments of armored personnel carriers and armored scout cars decreased in December and January and that shipments of model M-13 and M-31 rocket launchers discontinued in late November 1953. old 25X1
rocket launchers were returned to the USSR in early November. Prior to the end of 1953, a total of about 750 armored personnel carriers and armored scout cars, and 300 to 350 model M-13 and M-31 rocket launchers arrived in East Germany. Some of the armored personnel cars and scout cars were consigned to the KVP.

The shipment of artillery pieces from the USSR to East Germany which have been observed since October 1953, increased in December and January. Prior to 31 January 1954, about 500 new guns arrived in East Germany. It is believed that most of these guns were for use by Soviet units.

The intra-zonal military supply traffic was relatively light. A noteworthy feature of this traffic were increased gun shipments from ordnance depots to troop units and vice versa which may be connected with the current re-equipment of antitank units.

In late October 1953, the GOFG ordnance depot in JESSEN moved to JUTTERB-CG.

25X1

Kasernierte Volkspolizei.

8. The reorganization of the KVP in September 1953 involved an amalgamation of weak cadre and training units into divisions. These units had existed side by side with Armeegruppe Nord. This amalgamation was the most important progress made in the organization of the KVP in 1953. Available information indicates that the development planned for the KVP in 1954 may take the following course:

- a. The seven divisions at present in existence may be brought to full strength.
- b. Two additional divisions may be formed and merged with Mechanized Division POTSDAM into a third Armeegruppe. The KVP forces would then include three Armeegruppen, i.e. Armeegruppe Nord (POTSDAM), Armeegruppe Sued (LEIPZIG), and Armeegruppe Mitte (BERLIN), composed of a total of nine divisions.
- c. Energetic measures may be taken to improve the status of training and the combat-readiness of units. Conclusive evidence will probably hardly be forthcoming before the beginning of the first KVP maneuvers, which are expected to take place in the fall of 1954.

About 65,000 of a total of about 90,000 men incorporated in the KVP are assigned to troop units. In view of the fact that Armeegruppe Nord, at present, has only about 75 percent of its authorized strength, Mechanized Division POTSDAM has 60 percent, and Armeegruppe Sued has only 50 percent, an additional 30,000 men would be required to bring to full strength all KVP units. It is believed that this strength corresponds to the wartime strength of Soviet infantry and mechanized divisions. Should it be intended, however, to bring KVP units only to the peace-time strength of Soviet divisions, Armeegruppe Nord would approximately have reached its authorized strength, while Mechanized Division POTSDAM and Armeegruppe Sued would have about 90 percent and 70 percent respectively of their planned strength. In the latter case, only 8,000 to 10,000 men would be required. Although the KVP recruiting campaign, which has been conducted with the greatest intensity for some months, was not very successful, 8,000 to 10,000 men may be recruited in the course of this spring. The organization of two additional divisions may hardly be expected before the fall of 1954 after the completion of summer training. Only at this time will it be possible to form full-strength units from the existing cadre units. Simultaneously, it would be necessary to induct an additional 20,000 recruits. However, surprises are not ruled out, for previous experiences indicate that the development of the KVP is greatly influenced by the fluctuations of the political situation which cannot be foreseen.

Order of Battle.

9. Except in a few cases, the distribution of KVP units, schools and other installations has been determined. No major changes have occurred after October 1953. For tabulation showing the present KVP stations, see Annex 2.

Reports received [] it is intended to move high-echelon KVP command headquarters and all KVP agencies and installations from BERLIN to places outside the city. In connection with this plan, extensive construction projects have started in the STRAUSBERG area. Damaged buildings at STRAUSBERG airfield are being repaired and new buildings are under construction. The project will be given railroad connection. It appears that the KVP High Command is

SECRET/CONTROL - U.S. OFFICIALS ONLY

SECRET/CONTROL - U.S. OFFICIALS ONLY
- 12 -

25X1

scheduled to be quartered there. Buildings in STRAUSSBERG previously occupied by the Soviets have already been transferred to the KVP. A settlement for field-grade officers is scheduled to be erected north of STRAUSSBERG near WILKENDORF. The barracks installations southwest of STRAUSSBERG railroad station, most of which had been completed by late January 1954, has also probably been turned over to the KVP, although it was originally earmarked for the SSD Guard Regiment in BERLIN-ADLERSHOF. Other KVP installations are to move from BERLIN to FINOW and POTSDAM.

Training.

10. Winter training generally began in the first half of December 1953. However, some units whose reorganization had not been completed delayed the beginning of this training until about late January. In the course of the next months, minor contingents of newly recruited volunteers will continuously be incorporated into the training units. It appears, therefore, improbable that a uniform level of training should be reached by this summer. Accordingly unit-training will probably meet with difficulties. To date, no KVP units moved to troop training grounds for firing practices. WEISSWASSER troop training grounds is at present guarded by general police personnel.

Organization, Armament and Equipment.

11. The three mechanized divisions and four infantry divisions at present in existence are on the whole organized and armed like Soviet divisions of corresponding type, except for the following differences:

a. Mechanized Divisions.

The mechanized regiments possess 3 rifle battalions, but have no mortar battalion. The howitzer artillery regiment and the mortar regiment consist of three battalions each. So far, the rocket-launcher battalion has only been observed with Mechanized Division DRESDEN. However, it may be assumed that Mechanized Divisions POTSDAM and EGGESIN have in the meantime received a rocket-launcher battalion.

b. Infantry Division.

KVP infantry divisions have only one mixed artillery regiment composed of two battalions equipped with 76.2-mm guns and one battalion equipped with 122-mm howitzers.

The equipment with tanks and SP guns still varies greatly. Model SU-76 guns are still found with tank SP regiments. The obsolescent model SU-85 guns are also still held instead of the standard model SU-100 guns. On the other hand, the modern JSU-122 guns are also found. T-34/85 tanks represent the bulk of the medium tank equipment; however, T-34/76 tanks are also found. The model JS-III tank has generally been replaced by model JS-II tank. 160-mm mortars are not available, while 122-mm mortars are found only in the mortar regiment of mechanized divisions and Armeegruppen.

Between September and November 1953, the KVP received from the USSR more than 200 armored scout cars and personnel carriers, about 1,000 sidecar-motorcycles, and model ZIS-150 and ZIS-151 trucks. Factories in West Germany currently furnish motor vehicles, mostly model H 3, H 6, and Phaenomen "Granit" trucks. Model H 3 truck roughly corresponds

SECRET/CONTROL - U.S. OFFICIALS ONLY

SECRET/CONTROL - U.S. OFFICIALS ONLY

- 13 -

25X1

to the model ZIS-150 truck and the model H 6 truck to the model ZIS-151 truck. Since the fall of 1952, the motor vehicle strength of the KVP has approximately doubled, and the motility of KVP units has increased correspondingly. The motor vehicle equipment at present available is, however, not yet adequate to make all KVP fully motile.

Recruiting.

12. Since October 1953, the KVP recruiting campaign has been conducted after the directives issued by the Ministry of the Interior/KVP. The order issued by Lieutenant General Hoffmann on 26 September 1953, incorporates the following features:

- a. Recruiting activities for the VP will be conducted along uniform lines. Recruiting commissions will be formed from representatives of the SED and its affiliated organizations, the Athletic and Technical Association, the State Secretariat for State Security, the KVP, the HVDVP, and the HVDGP in all East German Bezirke and Kreise. The KVP district headquarters and recruiting offices are in charge of the organization of recruiting activities.
- b. All male East German citizens from 18 to 45 years old may be recruited. Preference is to be given to sons of workers and farmers, and all politically reliable elements. Former members of the German Armed Forces may also be recruited if they meet KVP requirements.

The following quotas were laid down for the assignment of recruited personnel:

Recruits 18 years old will be assigned as follows:

70 percent KVP - 25 percent HVDGP - 5 percent SSD

Recruits 19 years old will be assigned as follows:

50 percent KVP - 25 percent HVDVP - 20 percent HVDGP and
5 percent SSD

Recruits 20 to 30 years old:

45 percent HVDVP - 50 percent HVDGP - 5 percent SSD

Recruits from 30 to 45 years old:

100 percent HVDVP

The contingent for the VP Air and the VP Sea will be made available from the KVP quota.

The above tabulation clearly shows that the KVP is given priority in the assignment of younger classes.

Various reports [] state that members of the Border Police have been transferred to the KVP. It is rather evident that the reinforcement of KVP units ranks before the personnel requirements of other VP branches of service. Several thousand Border Police had already been transferred to the KVP in 1952.

- 14 -

25X1

Border Police.

13. The "Ring um BERLIN" organization represents a fourth Grenzpolizeibereitschaft. The headquarters of this Bereitschaft is stationed at SCHMAYENDORF near KÖNIGSMUSTERTHAUSEN. Between 1 and about 20 January 1954, the Hauptverwaltung der deutschen Grenzpolizei (Main Administration of the German Border Police) (HVDGP) moved from Heinrich-Mann Strasse in BERLIN to PARTZ south of KÖNIGSMUSTERTHAUSEN. [redacted] preparations for this transfer had started as early as October 1953, with, for instance, the former SED school in PARTZ vacated and several prefabricated buildings and garages built. The installation at PARTZ, allegedly, has a total quartering capacity of 1,600 men. The transfer of the HVDGP from BERLIN is believed to be connected with the overall plan to transfer all VP command agencies from BERLIN to places outside the city.

25X1

Transportation Police.

14. The transfer of the Transportation Police into the KVP as announced in the summer of 1953 is scheduled to be completed by June 1954. It is believed that, after this date, Betriebsschutz A, the members of which wear uniforms and have been trained like the Transportation Police will take over the former missions of the Transportation Police, while a newly organized "Betriebsschutz" will replace Betriebsschutz A. The incorporation of the Transportation Police into the KVP would raise the strength of the latter organization by 7,000 to 8,000 men.

Employment of the VP during the Four-Power Conference.

15. About 15 January 1954, the entire VP, i.e. KVP, HVDGP, Transportation Police, and HVDVI, were placed on alert status and all passes were cancelled. Units of various branches of the VP were transferred from the zone to BERLIN. These measures were motivated with the necessity of safeguarding security during the Four-Power Conference. The measures taken indicate that the East German Government fears the EAST BERLIN population may hold pro-Western demonstrations during the Conference and, after the experiences made during and after 17 June, has taken all steps to quell such demonstrations at their very beginning.

AUSTRIA - HUNGARYOrder of Battle.

16. Soviet units identified from documents obtained during the period under review included:

59th Sig Regt	[redacted]	BADEN	2 November

Training.

17. Information on the training program, the prolonged term of service of Soviet officers of the occupation forces and the arrival at the Soviet-occupied zone of Austria of officer families from the USSR checks with observations in East Germany. Documents obtained included applications for the transfer to Austria of Soviet officer dependents.

Personnel.

18. The arrival of replacements in East Germany, which involved members of the 1934 class who had been inducted in the fall of 1953, and the re-transfer to the USSR of discharges continued until the second half of November 1953.
